Work Experience

Service Technician | Aplikacija, Vinkovci

NOVEMBER 2019 - SEPTEMBER 2024

- Performed maintenance and repair of computers, mobile phones, and gaming consoles.
- Responsible for system installations, troubleshooting, and software repairs.
- Utilized Linux systems to identify system vulnerabilities, recover data for clients, and bypass device locks.
- Conducted reverse engineering to analyze software and system components for troubleshooting and functionality enhancement.
- Managed communication with suppliers and clients to ensure efficient service delivery.
- Handled mail reception and correspondence with telecommunication operators.

Soldier | Ministry of Defence of the Republic of Croatia, Karlovac

SEPTEMBER 2015 - SEPTEMBER 2019

- Maintained military systems and equipment.
- Supervised work schedules and coordinated logistics operations for military units.

Intern | Vinkovci City Administration, Vinkovci

AUGUST 2014 - MAY 2015

- Participated in professional training and gained experience in administrative tasks according to specific regulations.
- Assisted in organizing and executing public tenders, including contacting competitors and performing fieldwork.
- Communicated with companies involved in tenders to ensure clarity and compliance.
- Participated in organization of city events, managing logistics and resource coordination.

Independent Project

"Termini za terene" Project | [Project Link](#)

- Developed a web application to streamline sports court management by allowing users to browse available times, book courts, and manage reservations.
- Designed and implemented the backend using C# and SQL, ensuring reliable data handling and business logic.
- Worked on frontend design using modern web technologies; partial integration between the "Termini" and "Tereni" tabs within the "Programi" page and the backend is underway.
- Designed the architecture following best practices, leveraging modular principles for future scalability and easy maintenance.
- Focused on scalability and performance, allowing potential future expansion for additional features or sports facilities.
- Gained experience in development, debugging, and version control through GitHub.

Education

Edunova, Osijek | Web

Development (C#)

MAY 2024 - OCTOBER 2024

- ◆ **SQL Database Management and Design** | Acquired skills in creating and managing relational databases.
- ◆ **C# Backend Development and Object-Oriented Programming (OOP)** | Developed backend solutions using C# and applied OOP principles.
- ◆ **Frontend Technologies** | Gained experience in HTML, CSS, and JavaScript for building user interfaces.
- ◆ **Application Deployment** | Learned techniques for deploying web applications to production environments.
- ◆ **Version Control with GitHub** | Utilized GitHub for version control and collaborative development.
- ◆ **CRUD Application Development** | Designed and implemented.
